

Research plays a vital role in our lives, from wildlife to nature. It is a process of investigation aimed at finding new of the world. Research is essential for the progress of more advance ideas and innovations. Importance of research in various fields ultimately contributes to our society.

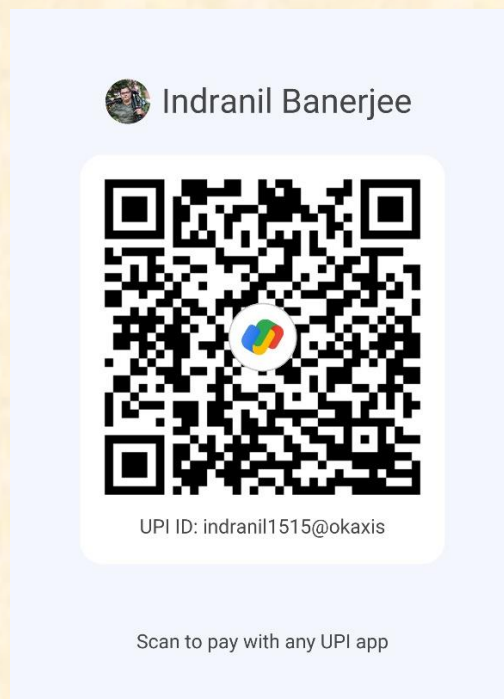

The United Nations published their Global Assessment Report recently, which revealed that at least one million species worldwide are at risk of extinction within the next few decades and that radical action is necessary to conserve Earth's ecosystems. To successfully inform conservation priorities and design conservation measures, it is necessary to understand the biology of wildlife species, assess the impact of biodiversity loss, and monitor changes in species communities.

Being a wildlife researcher, I realized the natural talent of other animals.

Animals teach us How to Live in the Now, While animals may be able to anticipate their future needs, they don't worry about the future as fervently as humans do. People waste so much time obsessed with following "what will happen next" that we completely forget to enjoy the now.

I need your support to extend my research and documentation work especially with this small creatures which are unexplored yet.

Bank Details:

My goal for 2024 is to help 100 boys/girls participate in NATURE STUDY activities including a full week at summer camp. I need help supporting this initiative. Will you help me meeting my goal to provide these wonderful boys/girls with worthwhile activities by supporting a boy/girl? Your donation will have a dramatic impact on the life of a young man/woman.

Here is how your gift will impact them:

₹2000 – A boy/girl will receive guidance on NATURE STUDY and be able to participate in monthly activities for one year.

₹5000 – A boy/girl will have a confirm slot at a week long summer camp with activities such as how to study nature, how to spot small creatures, how to study their behaviours and way of documentation.

₹10000 – A boy/girl will have a confirm slot at a week long summer camp with activities such as how to study nature, how to spot small creatures, how to study their behaviours and way of documentation with the photography equipment.
